DETAILED ACTION

Claim Objections

1. Claim 6 is objected to under 37 CFR 1.75b as being a duplicate of claim 5. Both claims 5 and 6 depend from claim 1 and are identical. It is uncertain what exactly applicant intends to claim.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Breed et al. (6,065,185).

Breed et al. has a case 170, a check plate 116, a shoe holder 181, a shoe 130, a check spring 150, a return spring 140, a high frictional surface 134 and a low frictional surface 135. Further, as shown by figure 4A, high frictional surface 134 is forced to contact with the strip member 116 to lock the strip in detenting position. Without a relatively high friction, surface 134 would not have been able to lock the strip in place. Similarly, as shown by figures 4C and 4B, low frictional surface 135 allows the strip to move in the non-detenting position. A relatively low friction is required in order to move the strip along its path. As to claim 7, a side-view of figure 2 clearly shows the strip member 116 situated in a center of the case.

Allowable Subject Matter

4. Claim 2 is allowed.
5. Claims 3-6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed Oct. 25, 2005 have been fully considered but they are not persuasive. Applicant's primary argument is based on the low/high frictional surface that is embedded with a high frictional material. However, there is no such material found in claims 1 and 7. Breed et al. simply meets the invention as claimed.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
